

## WIRE TENSIONING SYSTEMS

## TENSIONING SYSTEMS AND ACCESSORIES

| ES-CNT2  | <ul> <li>COMPRESSION SPRING LIMITER</li> <li>Light and medium duty: Available in<br/>a standard tension (silver) which can<br/>tension up to 1.2mm wires and a<br/>medium tension (gold) spring which<br/>can tension up to 1.6mm wires</li> <li>It eliminates galvanic reaction<br/>between dissimilar metal thus<br/>reducing rust and can be used with<br/>any type of wire</li> <li>Available in black and white</li> </ul>   |  |
|--|---|--|
| ES-DT/MN   | <ul> <li>MINI NYLON TITAN TENSIONER</li> <li>The fence needs to be tensioned after installation, especially when the system needs maintenance due to sagging wires</li> <li>It eliminates galvanic reaction between dissimilar metal thus reducing rust</li> <li>Ideal for tensioning wires up to 1.2mm galvanised or stainless steel, and up to 1.6mm aluminium wire</li> <li>A large headed screwdriver, which is generally easily available, is used to turn the spindle</li> </ul>  |  |
| Sectoral Esectoral Esector | <ul> <li>HYBRID NYLON TENSIONER</li> <li>Offers what the compression spring<br/>and the mini nylon titan has to offer<br/>in one easy-to-use system. Available<br/>in a standard tension (silver) spring<br/>which can tension 1.2mm wires and<br/>a heavy tension (gold) spring which<br/>can tension up to 1.6mm wires</li> <li>Combination of two tensioning<br/>systems, an active system to expand<br/>and compress as required, and the<br/>mini titan can take up any slack that<br/>has been created over time</li> </ul> |  |
